

LOG CABIN COLLORED - EASY TUTORIAL

Today I will show you the **EASIEST** possible way to make a **LOG CABIN** block. **WITHOUT** measuring any strip length!

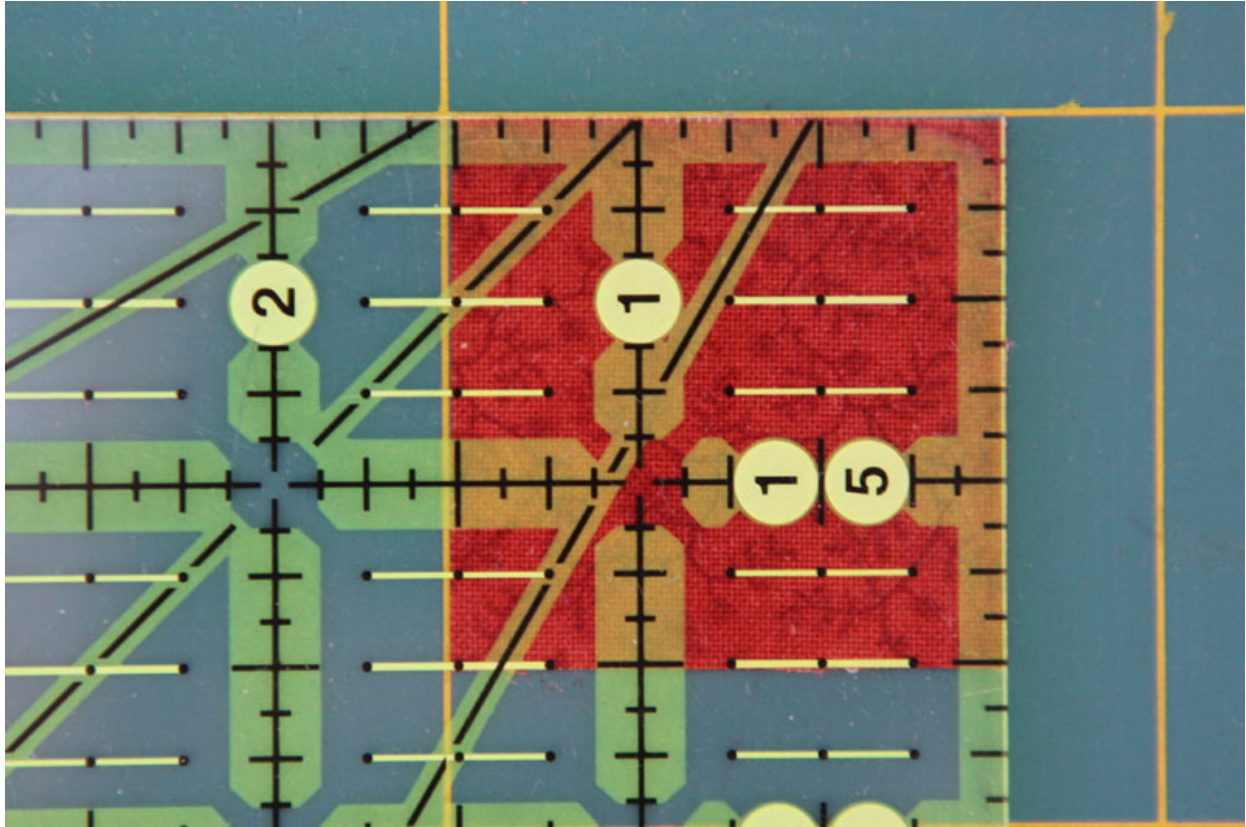

Finished block

The finished block measures 7 1/4" x 7 1/4"

Selected fabrics

My fabric selection : a red center, three dark pink and three light beige.
You can use any colors, but always a dark side and a light side.

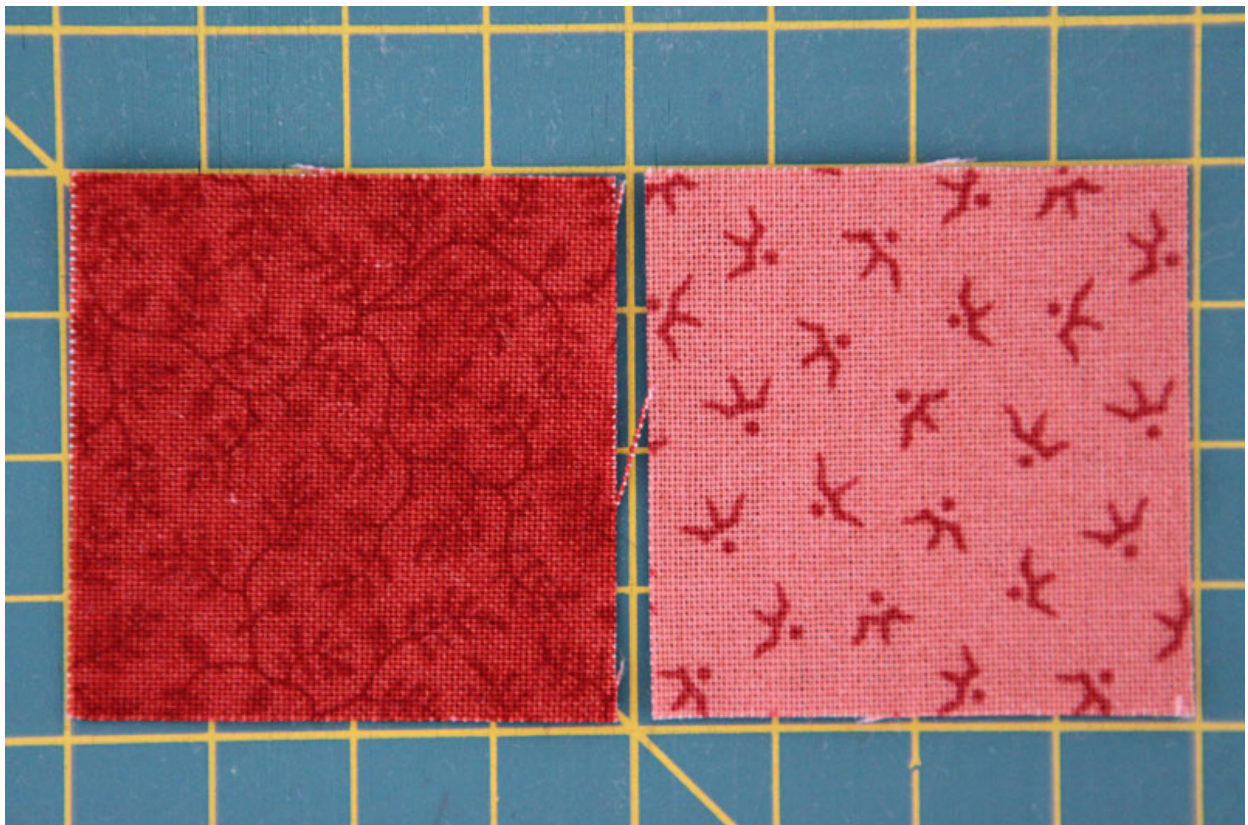

Center

For the central square, cut 1 1/2" x 1 1/2"

Strips ready

Cut your strips from the Cross Grain (from selvage to selvage), width 1 1/2".

Two squares

The first piece to add to the red center is a square, same dimensions as the center.

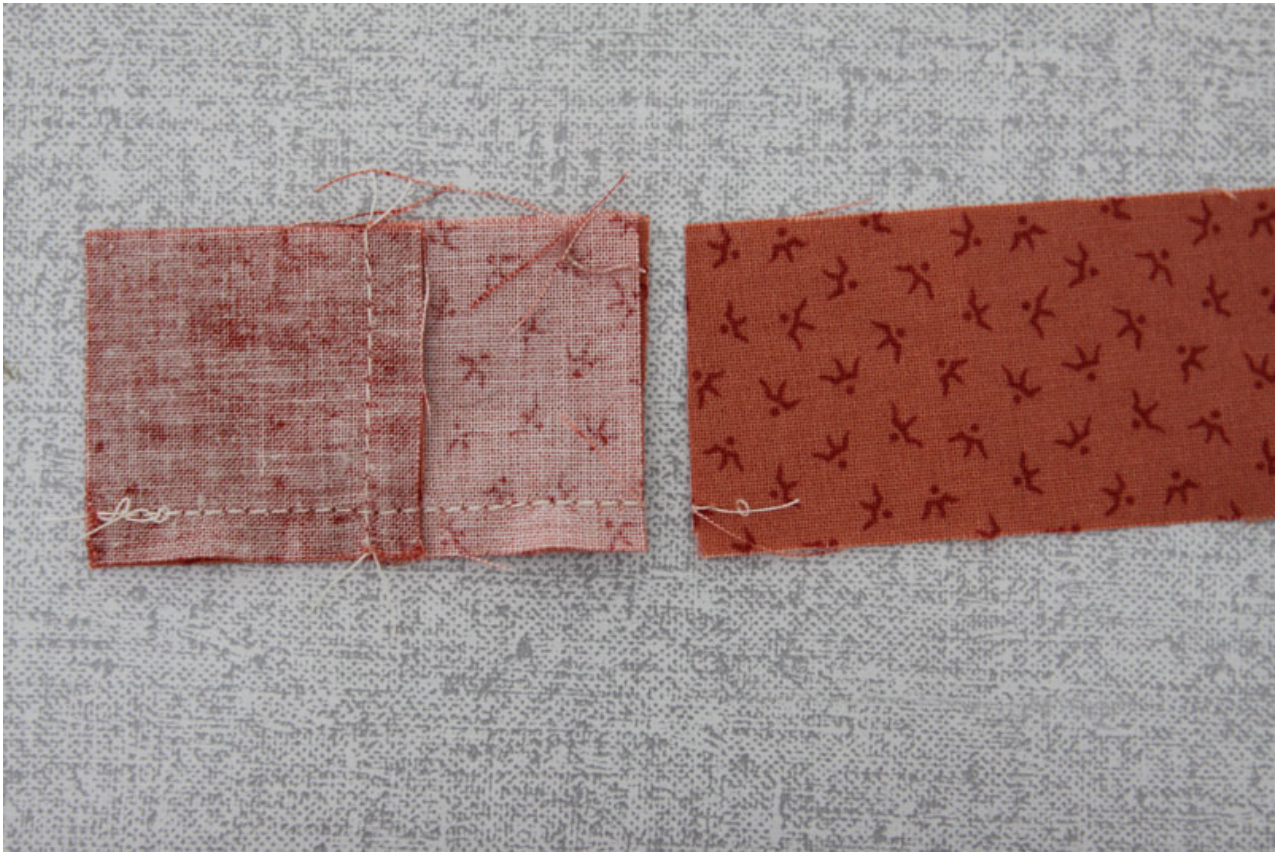

Two squares pieced

Piece those two squares right side against right side. Open and press. Turn once CLOCKWISE.

Add the strip of the same fabric, sew right side against right side.

Cut the remaining length of the strip.

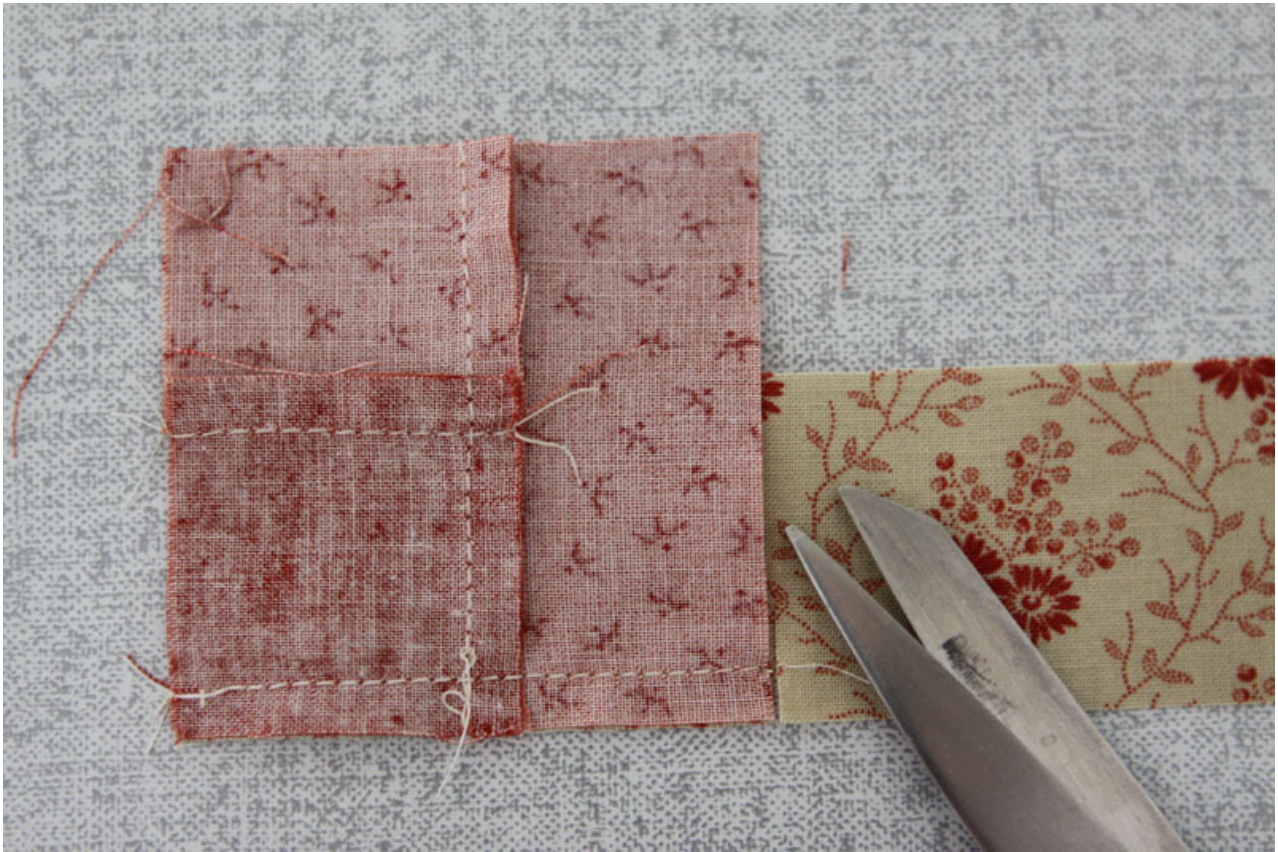

First row

Open and press. Turn once CLOCKWISE

Add the light color strip for the second row.

Cut the remain.

Go on the same way all the time for the other rows, always turning **ONCE CLOCKWISE** and **ALTERNATING** two dark strips and two light strips.

Second row

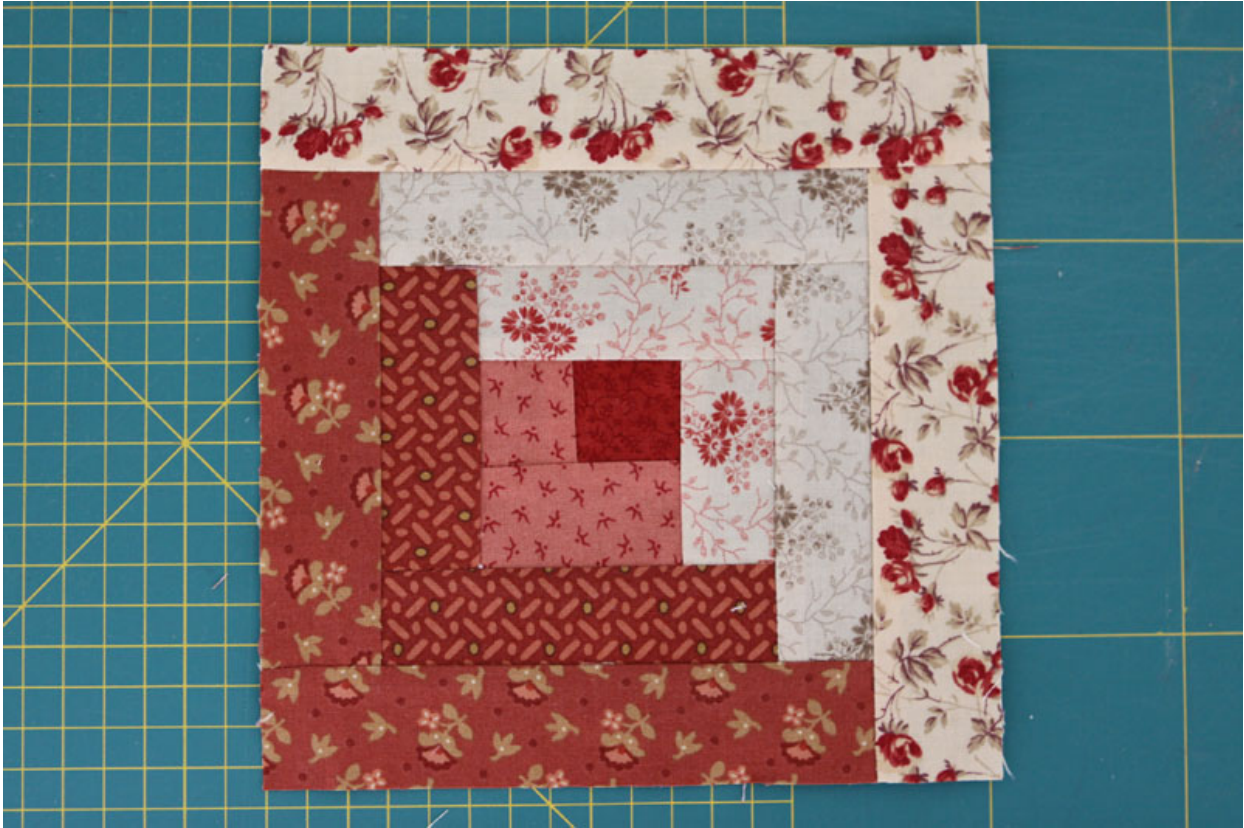

Third row

Fourth row

Fifth row

Sixth row

Press hot without moving your iron.

Your block is now finished, you may just need to trim the sides to get an accurate square of 7 1/2".

Enjoy your Log Cabin!
